

Presentation | 23 September 2026

# Growth *on the* horizon

EXPOSURE TO A DIVERSE BASKET OF  
WORLD EQUITY MARKET INDICES, IN USD

*International Titans Basket Ltd*  
(*“ITBL”*)

# Background

Source: Bloomberg – 28 Aug 2026 . MSCI All Country World Index Net Total Return used as a proxy for global equities. Bloomberg Short Treasury Total Return Index used as a proxy for money market returns. Bloomberg Global-Aggregate Total Return Index used as a proxy for global bonds. US CPI Urban Consumers NSA Index used as a proxy for inflation. Start date corresponding to when data is first available for MSCI All Country World Index Total Return (31 Dec 1998).

|                              | 26Y<br>Return | Compound<br>Annual<br>Growth Rate |
|------------------------------|---------------|-----------------------------------|
| Global Equities Total Return | 595%          | 7.3%                              |
| Global Bonds Total Return    | 122%          | 3.0%                              |
| Money Market Total Return    | 84%           | 2.2%                              |
| Inflation                    | 104%          | 2.6%                              |

### Notes:

Global equities have outperformed global bonds and money market over the long term. However, global equities have experienced higher volatility.

Since global equities started to recover in September 2022, the compound annual growth rate has been 22.6% including dividends. However, investors should consider if growth is likely to continue at this rate.

From 2022 onwards, global equities and global bonds seem to move in the same general direction. This begs the question whether a traditional 60/40 balanced portfolio consisting of equities and bonds is optimal.

# Track Record – 23 Years

## #1 in South African Market

**Structured Products Intelligence Award**  
Best South African Issuer: 2024, 2025 & 2026

### SRP Awards

- Best Distributor (South Africa) 2016, 2017, 2019, 2020, 2022*
- Best Performance (South Africa) 2016, 2017, 2019, 2022*
- Best Distributor (Offshore) 2019*
- Best House Africa 2017*
- Deal of the Year 2017, 2019*

# Share Overview – New Offering

Applications close on **16 October 2026**

## Term

**5 years and 1 month** with the potential to exit the investment early in normal market conditions

## Exposure to World Equity Markets in USD

The share's return is linked to a diverse basket of indices:

- **S&P 500**  
(35% weighting)
- **Euro Stoxx 50**  
(25% weighting)
- **Nikkei 225**  
(20% weighting)
- **FTSE 100**  
(10% weighting)
- **iShares MSCI Emerging Markets ETF**  
(10% weighting)

*92.9% correlated to the MSCI All Country World Index.*

## Capital Protection

**100% capital protection** at maturity in USD

*Subject to the credit risks as described in this document*

## Return

The share will return the growth of the index basket multiplied by a participation of **140%<sup>1</sup>, with index basket growth capped at 40%.**

Therefore, the maximum return is 56% (140% x 40%). Equivalent to 9.1% p.a. compounded, or 11.2% p.a. simple.

*1. The participation is dependent on market conditions on trade date (the current participation is 140% but ITBL reserves the right to trade a minimum participation of 125% if required due to market conditions on trade date).*

## Minimum Investment

**USD 14,000**

*Or AUD 20,000 for AUD denominated Class A shares*

# Valuations

The current price-to-earnings ratio for the MSCI All Country World Index is 22.5, which is higher than its long-term average of 18.9. This may indicate that the index is relatively highly valued compared to the underlying earnings of the companies it comprises.

Note: start date corresponding to when data is first available for MSCI ACWI Index. Source: Bloomberg 28 Aug 2026

# Timing the market can be difficult

The graph below shows that a relatively small number of trading days contributed significantly to overall returns. Attempting to time the market may lead to being out of the market during these key trading days.

# Timing the market can be difficult

The graph below shows the value of \$100 invested each year in global equities (total of \$2,100 invested since April 2006). The **orange line** shows the cumulative value of the investments if they were made at the highest point each year (**worst timing**). The **navy line** shows the cumulative value of the investments if they were made at the lowest point each year (**best timing**). Even with the worst timing, the cumulative investment value is higher than investing \$100 into a money market fund at the start of each year.

Source: Bloomberg – MSCI All Country World Index Net Total Return is used as a proxy for global equities. The Bloomberg Short Treasury Total Return Index is used as a proxy for money market. Data range: 25 April 2006 to 22 April 2026 This is a simulated investment as one cannot invest directly into these Indices.

# Value of 100% Capital Protection at Expiry

Index Basket = 50% Euro Stoxx 50, 50% Nikkei 225

Source: Bloomberg 31 Aug 2026

- The graph (left) illustrates the volatility of the equity markets. The 5.5 year period represents a previous basket term (2007 to 2012)
- Investors received 100% of their capital back at expiry even though the underlying indices were 44% down. If an investor had invested directly in the underlying indices, they would have been 38% down after adding back dividends
- At maturity of the offering, investors who received their full initial capital back could have invested directly into the underlying Index basket and benefited from the recovery

# Efficient Structure

The graph to the left depicts the return profile of the Guernsey company with the longest track record (Optimal Investment Growth Basket Limited). This company highlights the benefit of holding the Guernsey company shares for multiple offerings.

If an investor decides to remain invested at each maturity and subsequent offering, a new capital protection level and upside potential is locked in. This means that for each investment term, the impact of an equity market crash is limited to the expiry value of the previous iteration of the structured share. This can be contrasted to a direct investment into the equity market where a crash could occur at any point and any previous gains as well as capital invested could be eliminated.

# Back-Tested Payoff Simulation

5 year and 1 month (5.08y) rolling returns of the Index Basket vs. ITBL with 140% gearing up to a maximum return of 56%.

The graph on the left illustrates a simulated payoff for ITBL. Historic data for the Index was used to calculate the 5.08y rolling returns for every day from the first date that data is available for all Indices in the Index Basket (1987). The Index Basket 5.08y return was negative 22% of the time while ITBL would have returned the investor's capital.

# Instrument Breakdown

| COMPONENT OF STRUCTURE                                                                   | DAY 1 VALUE | MATURITY VALUE     |
|------------------------------------------------------------------------------------------|-------------|--------------------|
| Credit Linked Note ( <b>Debt Instrument</b> )                                            | 71.2%       | 100%               |

# Costs and Fees

An initial once-off expense provision of an estimated 0.5% of the Principal Amount (defined below) will be set aside to cover the Company’s costs over the investment period and the Company will not invest this amount. A total cost of approximately 7.07%, or 1.38% per annum, is built into the payoff.

|                                                                                          |                                                                                                                                     |                                                 |
|------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------|
| Annual fees will be charged within the Company to cover the following service providers: | Distributor fee:                                                                                                                    | 0.60%                                           |
|                                                                                          | Investment Adviser fee:<br>(Investec Corporate and Investment Banking is the Investment Adviser to International Titans Basket Ltd) | 0.60%                                           |
|                                                                                          | Administrator fee:                                                                                                                  | 0.13% in year one<br>0.11% per annum thereafter |

The distributor may charge a once off upfront fee of up to 2% plus VAT on new Shares issued. This will be deducted from the gross USD investment amount paid by each subscriber to the Company such that only the net amount (“Principal Amount”) will be invested in Shares of the Company.

# Track Record – Guernsey Companies

Average outperformance relative to underlying indices: **2.49% p.a.** 30% of this outperformance came from periods where the underlying index basket return was negative. Average dividend yield of MSCI ACWI over this period was 2.38%.

On a total return basis (including dividends), **10.7% and 9.2%** of funds outperformed over a 5Y and 10Y period, respectively.

\*All funds in the Morningstar “Global Large Cap Blend” category as at 28 February 2026

40 offerings over 23 years, of which 24 have matured.

23 offerings outperformed the underlying indices (96%). In 4 cases, the outperformance was due to not losing capital during the Global Financial Crisis.

The 1 underperforming offering returned 57% over 5 years vs. 79% for the underlying indices (this offering had 105% capital protection).

# Competitive Pricing Process

The below most recent Guernsey companies offer a payoff profile that includes exposure to the equity market through Equity Instruments. These options are purchased from large international banks. The Guernsey companies use a competitive bidding process where multiple banks provide their best price on trade date and the option provider with the best price wins the contract. Prices from the different banks vary depending on their valuation assumptions and appetite for the deal. The competitive process ensures that the banks provide their best price and that the Guernsey companies can select the bank with the most competitive price. This can be contrasted to a deal with a preselected option provider where there is limited pressure to reduce fees, and where the bank's appetite for the deal may be lower than their competitors.

# Risks

- 1. Counterparty & credit risk** — Capital protection applies only if Shares are held to maturity and is subject to credit risk. Default by the Debt Instrument Issuer or Equity Instrument Issuer, or a Credit Event on any Reference Entity, may reduce the Share value significantly.
- 2. Equity participation risk** — If the Index Basket does not show positive growth over the Investment Period, the Equity Instrument expires with no value and no upside above the initial capital is paid.
- 3. Currency / exchange rate risk** — The Company's underlying investments are denominated in USD. If the USD depreciates against the investor's home currency, the value of returns when converted back will be reduced — potentially eroding the Capital Protection benefit when measured in the home currency.
- 4. Tax & regulatory change** — Changes in legislation, regulation or tax treatment in any relevant jurisdiction may affect investor returns.

# Market Risk on Interest Rates

The investment objective as described in the Prospectus of the Company is twofold:

- 1. to preserve the investor’s capital in USD; and
- 2. to give meaningful participation in the growth in international equity markets

Interest rates have shown significant volatility in recent months as global inflation expectations and economic growth prospects in many countries have influenced markets. As of June 2026, interest rates are at relatively elevated levels, which in turn improves the potential equity participation of the Company. The Investment Adviser (Investec Bank Limited) will therefore seek to purchase some instruments (being interest rate hedges and/or Debt Instruments) ahead of the product trade date in order to secure these attractive yields. Please

note that it is not possible to purchase all of the Debt Instruments ahead of trade date given the uncertain size of the trade.

The Debt Instruments will be sold on to the Company on trade date at the same yield at which they were acquired. This will ensure that the Company can still meet its investment objectives even if the market yield on the Debt Instruments is lower than current levels on trade date. In addition, the costs and any gain/loss obtained from the Investment Adviser’s interest rate hedge will be passed through to the Company by means of an adjustment to the purchase price of the Debt Instrument. Investors should therefore be aware that movement in interest rates between the date of acquisition of the Debt Instruments/ interest rate hedges and the trade date will have the following effect on the payoff and day 1 valuation in various scenarios.

|                                                             |      |      | CURRENT |       |       |
|-------------------------------------------------------------|------|------|---------|-------|-------|
| Base rate on trade date                                     | 2.5% | 3%   | 3.5%    | 4%    | 4.5%  |
| Day 1 valuation gain or loss on USD 59m interest rate hedge | 3.5% | 1.8% | 0.0%    | -1.8% | -3.5% |

*Note: The above indicative table is based on a \$59m interest rate hedge ahead of trade date. Any valuation gain or loss on day one will only be realized to the extent that the Investor sells his/her Shares prior to the end of the investment term.*

# Credit Risk

**Investors have credit risk on counterparties of the Company, in particular the providers of the capital protection, the Reference Entities and Equity Instrument providers. The Equity Instrument provider(s) will have a S&P credit rating of “A” or better.**

## How is capital protection achieved?

A portion of the Company’s capital, being the capital invested by the investor, is used to purchase a Debt Instrument. This Debt Instrument will accrue interest over time until it matures at 100% of the Company’s capital. The payout from the Debt Instrument at maturity is used to return the Company’s capital, regardless of the movements of the equity market. However, the Company’s capital is at risk if there is a default or a credit event, in which case the full value of the Debt Instrument will not be paid out at maturity.

## Nature of Debt Instrument

The Debt Instrument is a Credit Linked Note (CLN). The holder of a CLN earns additional interest in exchange for taking on the credit risk of a third party (Reference Entities). The Reference

Entities are not directly involved in the transaction but the terms of the CLN stipulate that if a credit event occurs in relation to a Reference Entity’s subordinated debt then the issuer of the CLN is not obliged to repay the full outstanding capital. Therefore, the investor accepts that if the Debt Issuer defaults or a credit event occurs in relation to a Reference Entity’s subordinated debt, the initial capital is at risk.

## Credit Event

A credit event is defined as the following: bankruptcy, failure to pay, restructuring, obligation acceleration, government intervention, and/or repudiation/moratorium

# Credit Risk

## Adjustment Event

This includes a change in law, tax or hedging costs which increases the Debt Issuer's costs and the costs may then be passed on to the debt holder. This may have an impact on the expiry value of the Debt Instrument and thus the capital protection may not be fully effective. Such clauses are included as standard wording in Debt Instruments

and credit linked notes. The clauses exist to protect the Debt Issuer from a change in law, tax or hedging costs which have a material impact on the economics of the transaction. In discussions with a number of international banks, the banks confirmed that they are not aware of ever having invoked these clauses. Therefore, Investec is of the view that there is a very low risk that this circumstance materializes.

Additional purchases of Debt Instrument/s (if any) will be made in line with the requirements of the Prospectus. The Debt Issuer and the Reference Entities (in respect of the initial Debt Instruments and on any top-up portion) may be different to the names mentioned in this document but will remain one or more local and/or international banks to be selected by the Investment Adviser on or before the Trade Date, each with a long-term rating equal to or better than the rating of Investec Bank Limited, in the proportion of the nominal amount of the Debt Instruments.

Structured products provide capital protection through the assumption of credit risk. They are intended for sophisticated investors who understand this risk and are willing to take it. There is credit risk on the Debt Issuer, each Reference Entity (the credit risk relates to the subordinated debt issued by such Reference Entities), and the Equity Instrument provider(s). A default by any such party(ies) may cause the value of such investment of the company to be reduced or to become zero, which may adversely affect the share price or cause the share to become worthless.

# Supplier Details

AS REQUIRED BY THE FINANCIAL ADVISORY AND INTERMEDIARY SERVICES ACT ('FAIS'),

# Disclaimer

The information furnished in this document (“the Communication”) has been prepared by the Company and Investec Bank Limited, acting through its Corporate & Investment Banking division (herein referred to as “Investec”) in its capacity as investment adviser to the Company. This Communication does not constitute a research recommendation, investment, legal, tax or other advice; and is not to be relied upon in making an investment or other decision. The intended recipients should consider the information contained herein to be objective and independent of the interests of the trading and sales desk concerned. Opinions and any other content including data and market commentary in this Communication are provided for information purposes only.

The information contained herein has been obtained, where required, from various sources believed to be reliable and may include facts relating to current events or prevailing market conditions as at the date of this Communication, which conditions may change without notification to the Company and/or Investec and/or the recipient. This is a summary of relevant information and should not be considered as complete.

This Communication may not be considered as “advice” as contemplated in the Financial Market Act, 19 of 2012 and/or the Financial Advisory and Intermediary Services Act, 37 of 2002 as it does not take into account your financial position or needs.

This Communication may also not be seen as an offer to enter into or conclude any transactions. In relation to the information, the Company and/or Investec do not guarantee the accuracy and/or completeness thereof and accepts no liability in relation thereto.

You should make your own independent evaluation of the relevance and adequacy of the information contained herein and make such other investigations as you deem necessary, including, where relevant, obtaining independent financial advice, before participating in any transaction in respect of the securities referred to in this document.

Any opinions, forecasts or estimates herein constitute the personal judgement of the party who compiled this Communication as at the date of this document. Thus, this Communication reflects the different assumptions, views and analytical methods of the specific individual/party who prepared this Communication. As such, there can be no guarantee that future results or events will be consistent with any such opinions, forecasts or estimates.

Past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied is made regarding future performance.

There may be risks associated with the information, products or securities, including the risk of loss of any capital amounts invested or traded due to market fluctuations.

There is no obligation of any kind on the Company and/or Investec or any of its Affiliates to update this

Communication or any of the information, opinions, forecasts or estimates contained herein.

This Communication is confidential for the information of the addressee only and may not be reproduced in whole or in part, nor shall it be copied, redistributed or circulated, or disclosed to another unintended party, without the prior written consent of the Company and/or the relevant entity within Investec. In the event that you contact any representative of the Company and/or Investec or any party in connection with the receipt of this Communication, you should be advised that this disclaimer applies to any subsequent oral conversation or correspondence that occurs as a result of this Communication.

Any subsequent business you choose to transact shall be subject to the relevant terms and conditions thereof.

Neither the Company, Investec nor any officer or employee thereof accepts any liability whatsoever for any direct or consequential loss arising from any use of this Communication or its contents.

This product is not sponsored, endorsed, sold, or promoted by the index or indices, as specified herein, or the relevant Index sponsor, being the corporation or other entity that (a) is responsible for setting and reviewing the rules and procedures and the methods of calculation and adjustments, if any, related to the relevant Index and (b) announces (directly or through an agent) the level of the relevant Index on a regular basis. No Index sponsor makes any representation whatsoever, whether express or implied, either as to the results to be obtained from the use of the Index and/or the levels at which the Index stands at any particular time on any particular date or otherwise. No Index or Index sponsor shall be liable (whether in negligence or otherwise) to any person for any error in the Index and the Index Sponsor is under no obligation to advise any person of any error therein. No Index sponsor is making any representation whatsoever, whether express or implied, as to the advisability of purchasing or assuming any risk in connection with entering into any transaction in respect of this product. Neither Investec nor the investor shall have any liability to the other for any act or failure to act by the Index sponsor in connection with the calculation, adjustment or maintenance of the Index. Investec has no affiliation with or control over the Index or Index sponsor or any control over the computation, composition or dissemination of the indices. Although Investec will obtain information concerning the indices from publicly available sources it believes reliable, it will not independently verify this information. Accordingly, no representation, warranty or undertaking (express or implied) is made and no responsibility is accepted by Investec as to the accuracy, completeness and timeliness of information concerning the indices.

International Titans Basket Limited (“the Company”), registration number 52616.
